Gabriela and Linda,
What is the resource you are looking at to determine pesticide buffers? I am very confused by the entire situation and if I were a farmer I would "hate" EPA-even more than before...The recent court order includes only 5 and when I went to EPA's website it doesn't include any updated information but references buffers as a result of the 2004 court order for 36 active ingredients.
Signed
Confused in Boise...

Hi Jenny,

I saw your action item in the notes:

Dirk, Linda, and Gabriela, I think you've provided this before, but can you tell us which herbicides have court-ordered buffers still in place? For some reason, I thought they were just insecticides.

Here is the BiOp schedule:
http://www.nmfs.noaa.gov/pr/consultation/pesticide_schedule.htm

Here are the BiOps that haven't been issued, so the original court ordered buffers are still in place for these pesticides (including the three yellow highlighted herbicides)

Batch Opinion Active
Ingredient Use Deadline
7 Propargite Acaricide TBD
7 Fenbutatin-oxide Insecticide TBD
7 Diflubenzuron Insecticide and
fungicide TBD
TBD 1,3-D Insecticide TBD
- Lindane -canceled, use prohibited since August 2009, will not be reviewed Insecticide TBD
TBD Racemic
metolachlor Herbicide TBD
TBD Bromoxynil Herbicide TBD
TBD Prometryn Herbicide TBD

Also on your note:

Ex. 5 - Deliberative

Thanks for your notes. They are very helpful.

Good meeting today with a lot of information and ideas (cc: JB, FYI). Attached are notes and

follow-up from the call. We'll talk again on September 11, and feel free to share any additional thoughts with me and/or the group before.

Below is a link to some information on ODF's pesticide program. To see the ODF and ODA strategy, open the "ODF Aerial Pesticide Application Monitoring Study." There are also some fact sheets on their program.
